## Scope of Work for Spare/Repair Parts under CLIN 3008 Delivery Order

HSCG23-09-J-ARP069, Hulls 45609 - 45636

### Delivery of Onboard Spare Parts, Maintenance Procedure Cards (MPC) Expendables, and Special Tools with each RB-M

#### 1. [Orig] Background

- 1.1. Each RB-M will be provided with an initial load out of onboard spare parts, MPC expendables, and Special Tools in conjunction with the delivery of each RB-M to the receiving station.
  - 1.1.1. [Orig] Onboard spare parts are required for new RB-Ms to be able to correct minor underway casualties and be ready for operations.
  - 1.1.2. [Orig] To facilitate the evaluation of technical data associated with organizational level MPCs developed under this Contract, each RB-M shall receive a one year supply of expendable MPC items.
  - 1.1.3. [Orig] Station personnel require special tools in order to conduct maintenance on the RB-M and its new systems. As each Coast Guard Station receives its first RB-M, special tools shall be provided.

#### 2. [Orig] Requirements

- 2.1. [Orig] Included as Enclosure (1) is the list of required items, the quantity, Part Nomenclature, NSN (if applicable), Part Number, CAGE, Unit of Issue, **and applicable MPC Number** of all items to be delivered.
- 2.2. [Orig] The Government and Contractor will conduct a joint inventory of the items included in Enclosure (1) prior to shipment to the receiving Coast Guard Station to verify the completeness of the kitted items against the required delivery list. A copy of the joint inventory, signed and dated by both parties, shall accompany each shipment and its corresponding invoice. A completed copy of the packing list/inventory sheet shall be included in the boxed shipment noting any discrepancies or back ordered items, if any. Each shipment shall be direct shipped from the Contractor's facility to the receiving Coast Guard Station by commercial means with a tracking number and delivery confirmation. Shipper delivery confirmation will be used to verify completion of the Delivery Order for invoicing purposes and shall be attached to each invoice. All shipments will be addressed to Response Boat-Medium PRO Personnel, c/o the applicable CG Station, and the Station's address.
- 2.3. [Orig] Packaging and Handling – The Contractor shall handle, package, mark and deliver parts in accordance with packaging instructions in SOW [Section 084](#) and Contract [Section D](#). The Contractor shall take special care to ensure that the items in Enclosure (1) are packaged to facilitate the joint inventory required by Section 2.2 above.

- 2.3.1. [Orig] Onboard spare parts may be provided in multiple or separate packages, but each package shall only contain on board spare parts and shall not contain any other items. Packages containing onboard spare parts shall be clearly marked indicating that the package contains RB-M on board spare parts.
- 2.3.2. [Orig] MPC expendables may be provided in multiple or separate packages but each package shall only contain MPC expendables and shall not contain any other items. **Each Expendable item label shall be marked with its respective MPC Number as outlined in Enclosure 1.** Packages containing MPC expendables shall be clearly marked indicating that the package contains RB-M MPC expendables.
- 2.3.3. [Orig] Special Tools may be provided in multiple or separate packages, but each package shall only contain special tools and shall not contain any other items. **Each Special Tool label shall be marked with its respective MPC Number as outlined in Enclosure 1.** Packages containing special tools shall be clearly marked indicating that the package contains RB-M Special Tools.
- 2.4. [Orig] Deliveries – All items included in Enclosure (1) shall be provided no later than the scheduled boat delivery date and no earlier than 10 days prior to the scheduled boat delivery date beginning with RB-M 45609 through RB-M 45636. If the Contractor is unable to provide all items included in Enclosure (1) within this window for Hull 45609, the Contractor shall advise the Government by 6 March 2009 which RB-M will be the first provided with the onboard spare parts, MPC expendables, and special tools. In the event the Contractor cannot meet the delivery window for Hull 45609, the USCG will purchase those items separately and reduce the number of kits on this Delivery Order.
- 2.5. [Orig] Modifications to Enclosure (1) – No substitution of onboard spare parts, MPC expendables, or special tools are authorized without permission from the Contracting Officer. However, as part of the effort required under SOW 086-2.4.2.1 to perform validation of the MPCs, or via other means, the Contractor may become aware of necessary modifications to Enclosure (1). The Contractor shall notify the Contracting Officer **via the Project Resident Office (PRO) Contracting Officer's Technical Representative (COTR)** of any proposed modifications to Enclosure (1) within 5 days of becoming aware of them, and identify the first hull the revised Enclosure will be applicable to **as well as any hull kits, beginning with Hull 45601, that will need to be retrofitted.** The Government will evaluate the proposed modifications, provide a revision to Enclosure (1), and identify which hull the revised Enclosure will be applicable to **and approve all retrofit items.** The Contractor shall use the Contract Problem Identification Report (CDRL 042-003) to notify the Government **PRO COTR** of these potential modifications to Enclosure (1). **If it is necessary to ship retrofit items, the Contractor shall handle, package, mark and deliver these retrofit parts or tools in accordance with packaging instructions in SOW Section 084 and Contract Section D. Each retrofit part or tool shall be marked with its respective MPC Number in Enclosure (1). Invoicing of these items shall be under the Not to Exceed line item of this Delivery Order.**
